

TRACCARD STORED-VALUE CARD SYSTEM

If you are looking for a reliable, cost-effective stored value card system, look no further. **TRACSYSTEMS** has the perfect solution. The **TRACCARD** System allows you to avoid database or deposit accounts and uses encryption encoding technology that virtually eliminates card corruption. Rugged small footprint readers are extremely dependable for multiple functions. All products and parts are stocked and supported by **TRACSYSTEMS**. We can even convert the stripe on most existing cards. Here's how the system works:

AVS III - Dispenser & AddValue Station

The **TRACSYSTEMS AVS III** is a stored value card dispenser and revaluator designed and manufactured by **TRACSYSTEMS** for use with the popular **TRACCARD** print and copy payment system. The **AVS III** is a stand-alone device that requires only a power outlet. The 5.7" color touchscreen easily guides users through each step. New **TRACCARDS** can be bought or existing cards can be inserted to add funds by coin, bill, credit card, or any combination of the three. Receipt printer is optional.

The **AVS III** uses a flexible modular design for custom configuration and ease of diagnostics. The **AVS III** can easily be added to your current Cartadis card system. (Size: 20¾"T, 19¾"W, 12"D)

TCRS - Release Station Terminal

The **TCRS TRACCARD** Release Station terminal is a card reader designed to connect to a computer where users release their print jobs. After logging into the print release station and inserting their **TRACCARD**, the user's card balance will display. Print jobs can now be released and when finished, the new balance will be written to the user's card and ejected. The terminal connects via serial port or with a serial to USB adapter. (Size: 7"L, 4"W, 3¾"T)

TC11 - Copier Terminal

The **TC11 TRACCARD** Copier Control terminal is a card reader designed to control all popular makes and models of copiers, allowing an organization to charge for copying services. Users insert their **TRACCARD** to enable the copier for normal use. The **TC11** will display the user's card balance as copies are made and stop the machines when below the minimum balance. The **TC11** connects to foreign device interface or FDI port. (Size: 7"L, 4"W, 3¾"T)

TC41 - "MiniTill" Staff Terminal

The **TC41 "MiniTill" Staff Terminal** is used by staff members to manually initialize, credit, and debit a **TRACCARD**. The TC41 can also be used as a time controller that enables charging for use of computer or typewriter, etc. In addition, the TC41 can be used as a mini-POS, where various items and prices can be setup, and purchased with a user's **TRACCARD**. (Size: 7½"L, 5"W, 4"T)

TCVS - Release Station Vending

The **TCVS TRACCARD Vend Station** allows users to use coins, bills, or their **TRACCARD** to release print jobs from a print release station in most popular print and copy management software. After logging into the print release station and inserting their **TRACCARD**, the user's card balance will display. Cash can also be added. Print jobs can be released. When finished, the new balance will be written to the user's card and ejected.

The terminal connects via serial port or with a serial to USB adapter.

TCCS - Copy Vend Station

The **TCCS TRACCARD Copy Station** allows users to use coins, bills, or their **TRACCARD** to pay for copies. The TCCS connects to major make and model copiers through the foreign device interface (FDI). As users add minimum amount of cash or insert their **TRACCARD**, the copier will be enabled for normal use. After their copy session is over, the card balance will be updated and ejected.

 **TRACSYSTEMS**
Print. Copy. Reserve. Save.

TRACCARD

CUSTOM CARD PRINTING AVAILABLE

We can customize the **TRACCARD** by printing your library card or student ID template information on the front and back. As cards are issued, your staff can print patron barcode information or student ID.

To learn more, contact the **TRACSYSTEMS** Sales Department today. We can supply a number of very satisfied references and would love the opportunity to put together a custom solution for your organization.
